

Sustainability for Finney County

Randy Partington
County Administrator

Perspective

Finney County sees sustainability as a manner in which to provide essential services to the community in a conservative nature.

Strategic Plan

- Streamline county services to align with available revenues, and maximize efficiency and responsiveness in the delivery of services
- Provide for capital improvements that support local commerce and public safety
- Improve communication to inform the community about county services and initiatives, and expand citizen engagement
- Expand partnerships with the City of Garden City and other public/private entities to leverage resources, eliminate service redundancies and maximize local influence in state and federal decision making
- Contribute to community problem solving and quality of life
- Provide for a high-performing county workforce to deliver services

Energy Efficiencies

Ongoing Maintenance and Enhancements to improve on energy use

- Examples, changing of lights to LED, watering at night, higher quality of air filters

Economy/Growth

- Infrastructure/Economy
 - Controlled growth
 - Farming Practices
 - Politics
 - Sales Tax, Housing Incentives, Property Tax Abatements

Employment

- Workforce development per Strategic Plan
- Health Insurance
 - Health Clinic to keep costs down and maintain an health insurance plan that is marketable compared to our lower wages than the private sector
